

## Drug and Alcohol Abuse Prevention Program

Revised 7/1/2023

**Campus Location:**      **Aviation Institute of Maintenance**  
**2725 S. US Highway 17/92, Casselberry FL 32707**  
**407-896-2800**

The Drug Free Schools and Campus Regulations (EDGAR Part 86.100, Subpart B) require that, as a condition of receiving funds or any other form of financial assistance under any federal program, an institution of higher education must certify that it has adopted and implemented a program designed to prevent the unlawful possession, use, or distribution of illicit drugs and alcohol by students and employees, both on the institution's premise and as part of its activities. This Drug and Alcohol Abuse Prevention Program (DAAPP) policy was developed to inform the Institute, students, and employees of the seriousness of the use and abuse of illicit drugs and alcohol and to set forth the standards of conduct regarding such activity.

Aviation Institute of Maintenance supports the Drug-Free Schools and Campuses Regulations and is committed to providing a safe, healthy educational and work environment for all students and employees.

### **(1) Distribution of Annual Notification**

The EDGAR Part 86 requires that schools annually distribute alcohol and drug policy notification in writing to students and employees. On or before October 1 of each year, an email is sent to all employees and students which contains a direct link to a PDF version of this policy. All new students who enroll after the distribution date will receive a copy of this policy during mandatory orientation prior to starting classes. New employees hired after the annual distribution date will receive a copy as part of the new employee materials. Additionally, a copy of the PDF is posted to the school's consumer information website for continuous reference.

Through the annual distribution of this policy, the school certifies that they have implemented a drug and alcohol prevention program in accordance with the Drug-Free Schools and Communities Act (DFSCA), as articulated in the Education Department General Administrative Regulations (EDGAR) Part 86, known as the Drug-Free Schools and Campuses Regulations pertaining to Drug and Alcohol Abuse Prevention.

**A. Standards of Conduct**

The unlawful possession, use, or distribution of illicit drugs and alcohol on Institute property or at any school sponsored activity by all students, staff, and faculty is strictly prohibited, even by individuals who are otherwise of legal age to do so. This includes the campus buildings, campus grounds, and parking areas, or while participating in off-site school/work-related activities such as but not limited to field trips, graduation ceremonies, school-sanctioned community service activities, or professional meetings attended by employees on behalf of the school.

These standards of conduct apply to all students who are registered at the Institution for at least one course as well as all full time and part time staff and faculty.

The Institution reserves the right to take whatever measures it deems necessary in response to an allegation of alcohol or other drug use in order to protect employees and students and the personal safety of the entire Institute’s community. A student or employee who violates the drug and alcohol policy, including underage drinking, is subject to both the campus policies and to criminal sanctions provided by federal, state, and local law. All instances of illegal drug use or underage drinking will be referred to the local authorities. Additionally, the school will impose disciplinary sanctions as defined in the Student Code of Conduct or the Employee Handbook for failure to abide by the standards of conduct.

**B. Legal Sanctions**

A student or employee who violates the drug and alcohol policy is subject to both the Institute’s policies and to criminal sanctions provided by federal, state, and local law. The following are a summary of the applicable legal sanctions.

**FEDERAL PENALTIES FOR TRAFFICKING AND POSSESSION OF A CONTROLLED SUBSTANCE**

<b>DRUG/SCHEDULE</b>	<b>QUANTITY</b>	<b>PENALTIES</b>	<b>QUANTITY</b>	<b>PENALTIES</b>
Cocaine (Schedule II)	500–4999 grams mixture	<b>First Offense:</b> Not less than 5 yrs, and not more than 40 yrs. If death or serious injury, not less than 20 or more than life. Fine of not more than \$5 million if an individual, \$25 million if not an individual.  <b>Second Offense:</b> Not less than 10 yrs, and not more than life. If death or serious injury, life imprisonment. Fine of not more than \$8 million if an individual, \$50 million if not an individual.	5 kgs or more mixture	<b>First Offense:</b> Not less than 10 yrs, and not more than life. If death or serious injury, not less than 20 or more than life. Fine of not more than \$10 million if an individual, \$50 million if not an individual.  <b>Second Offense:</b> Not less than 15 yrs, and not more than life. If death or serious injury, life imprisonment. Fine of not more than \$20 million if an individual, \$75 million if not an individual.  <b>2 or More Prior Offenses:</b> Not less than 25 years. Fine of not more than \$20 million if an individual, \$75 million if not an individual.
Cocaine Base (Schedule II)	28–279 grams mixture		280 grams or more mixture	
Fentanyl (Schedule II)	40–399 grams mixture		400 grams or more mixture	
Fentanyl Analogue (Schedule I)	10–99 grams mixture		100 grams or more mixture	
Heroin (Schedule I)	100–999 grams mixture		1 kg or more mixture	
LSD (Schedule I)	1–9 grams mixture		10 grams or more mixture	
Methamphetamine (Schedule II)	5–49 grams pure or 50–499 grams mixture		50 grams or more pure or 500 grams or more mixture	
PCP (Schedule II)	10–99 grams pure or 100–999 grams mixture		100 gm or more pure or 1 kg or more mixture	

PENALTIES		
Other Schedule I & II drugs (and any drug product containing Gamma Hydroxybutyric Acid)	Any amount	<b>First Offense:</b> Not more than 20 yrs. If death or serious injury, not less than 20 yrs, or more than life. Fine \$1 million if an individual, \$5 million if not an individual. <b>Second Offense:</b> Not more than 30 yrs. If death or serious bodily injury, life imprisonment. Fine \$2 million if an individual, \$10 million if not an individual.
Flunitrazepam (Schedule IV)	1 gram	
Other Schedule III drugs	Any amount	<b>First Offense:</b> Not more than 10 years. If death or serious injury, not more than 15 yrs. Fine not more than \$500,000 if an individual, \$2.5 million if not an individual. <b>Second Offense:</b> Not more than 20 yrs. If death or serious injury, not more than 30 yrs. Fine not more than \$1 million if an individual, \$5 million if not an individual.
All other Schedule IV drugs	Any amount	<b>First Offense:</b> Not more than 5 yrs. Fine not more than \$250,000 if an individual, \$1 million if not an individual.
Flunitrazepam (Schedule IV)	Other than 1 gram or more	<b>Second Offense:</b> Not more than 10 yrs. Fine not more than \$500,000 if an individual, \$2 million if other than an individual.
All Schedule V drugs	Any amount	<b>First Offense:</b> Not more than 1 yr. Fine not more than \$100,000 if an individual, \$250,000 if not an individual. <b>Second Offense:</b> Not more than 4 yrs. Fine not more than \$200,000 if an individual, \$500,000 if not an individual.

#### FEDERAL TRAFFICKING PENALTIES—MARIJUANA

DRUG	QUANTITY	1st OFFENSE	2nd OFFENSE *
Marijuana (Schedule I)	1,000 kg or more marijuana mixture; or 1,000 or more marijuana plants	Not less than 10 yrs. or more than life. If death or serious bodily injury, not less than 20 yrs., or more than life. Fine not more than \$10 million if an individual, \$50 million if other than an individual.	Not less than 15 yrs. or more than life. If death or serious bodily injury, life imprisonment. Fine not more than \$20 million if an individual, \$75 million if other than an individual.
	100 kg to 999 kg marijuana mixture; or 100 to 999 marijuana plants	Not less than 5 yrs. or more than 40 yrs. If death or serious bodily injury, not less than 20 yrs. or more than life. Fine not more than \$5 million if an individual, \$25 million if other than an individual.	Not less than 10 yrs. or more than life. If death or serious bodily injury, life imprisonment. Fine not more than \$20 million if an individual, \$75million if other than an individual.
	More than 10 kgs hashish; 50 to 99 kg marijuana mixture More than 1 kg of hashish oil; 50 to 99 marijuana plants	Not more than 20 yrs. If death or serious bodily injury, not less than 20 yrs. or more than life. Fine \$1 million if an individual, \$5 million if other than an individual.	Not more than 30 yrs. If death or serious bodily injury, life imprisonment. Fine \$2 million if an individual, \$10 million if other than an individual.
	Less than 50 kilograms marijuana (but does not include 50 or more marijuana plants regard-less of weight) 1 to 49 marijuana plants;	Not more than 5 yrs. Fine not more than \$250,000, \$1 million if other than an individual.	Not more than 10 yrs. Fine \$500,000 if an individual, \$2 million if other than individual.
Hashish (Schedule I)	10 kg or less	Not more than 5 yrs. Fine not more than \$250,000, \$1 million if other than an individual	Not more than 10 yrs. Fine \$500,000 if an individual, \$2 million if other than individual
	1 kg or less	Not more than 5 yrs. Fine not more than \$250,000, \$1 million if other than an individual.	Not more than 10 yrs. Fine \$500,000 if an individual, \$2 million if other than individual

\* The minimum sentence for a violation after two or more prior convictions for a felony drug offense have become final is not less than 25 years imprisonment and a fine up to \$20 million if an individual and \$75 million if other than an individual.

## Federal Law, Alcohol

Alcohol is not considered a controlled substance under the USE Code and is not subject to the same federal regulations as other drugs. The Federal Uniform Drinking Age Act of 1984 sets the minimum legal drinking age to 21. Individual states control the regulations and penalties relating to the possession and distribution of alcohol.

## State Law

The school complies with all federal, state, and local laws with regard to illicit drugs and alcohol.

### Florida State Law, Controlled Substances

Schedule	Common substances	Description
I	Cannabis, Heroin LSD (Acid), MDMA Ecstasy, Peyote	Very high potential for abuse and currently has no accepted medical use in treatment in the United States. Use of a Schedule I drug under medical supervision also does not meet accepted safety standards
II	Cocaine, Meth Vicodin, Fentanyl Morphine, Opium Oxycodone	High potential for abuse and currently has no accepted medical use in treatment in the United States. Use of a Schedule I drug under medical supervision also does not meet accepted safety standards
III	Anabolic steroids Ketamine testosterone	Potential for abuse less than Schedule I and II substances, accepted medical use in treatment. Abuse may lead to moderate or low physical dependence or high psychological dependence or physical damage
IV	Ambien, Xanax Tramadol, Valium	Low potential for abuse relative to the substances in Schedule III, accepted medical use in treatment. Abuse may lead to limited physical or psychological dependence.
V	Stimulants, Codeine Opium	Low potential for abuse, accepted medical use in treatment. Abuse may lead to limited physical or psychological dependence.

## Florida Drug Possession Laws

The Florida Comprehensive Drug Abuse Prevention and Control Act (Florida Statutes, Title XLVI, Chapter 893) proclaims that "a person may not sell, manufacture, or deliver, or possess with intent to sell, manufacture, or deliver, a controlled substance." Classifications and quantities of drugs have a profound impact on the penalties for possession or possession with intent to deliver.

The state treats drug crimes more seriously the closer they are to being a Schedule I substance. Additionally, penalties for Florida drug crimes might significantly increase depending on how much substance a person is charged with. For example, if the drug is in Schedule V, the charge could be a first-degree misdemeanor with penalties that include imprisonment for up to 1 year and a fine of up to \$1,000. If the drug, however, was a Schedule I, it is considered a second-degree felony.

List of drug charges & penalties:

Substance	Amount	Charge	Incarceration	Fine
Schedule I	More than 10 grams	1st degree felony	up to 30 years	up to \$10,000
Any other controlled substance	More than 10 grams	3rd degree felony	up to 5 years	up to \$5,000
Marijuana	Up to 20 grams	1st degree misdemeanor	up to 1 year	up to \$1,000 fine
Marijuana	More than 20 grams	3rd degree felony	up to 5 years	up to \$5,000

Other penalties may include probation, community service, drug counseling and/or treatment, random drug testing, or a two-year driver's license suspension. A felony conviction may also have an adverse impact on certain educational or educational opportunities.

### Drug Trafficking

Drug trafficking is the intentional sale, purchase, manufacture, delivery, possession, or transportation of a controlled substance in excess of certain statutory limits. The weight limits vary depending on the substance in question. Drug trafficking charges carry significant penalties that increase with the amount of the illegal drug found in your possession. Common illegal drugs and the minimum weight limit for trafficking charges are as follows:

- Marijuana: 25 pounds or 300 plants;
- Cocaine: 28 grams;
- Hydrocodone: 14 grams;
- LSD (acid): 1 gram;
- MDMA (ecstasy): 10 grams; and
- Oxycodone: 7 grams.

Depending on the drug in question, sentences for trafficking range from a minimum of 3 years in prison and/ or a fine of \$50,000 to life in prison without parole.

### Florida State Law, Alcohol

In Florida, it is unlawful for a person under the age of 21 to possess or drink an alcoholic beverage. Underage possession can be classified as a first or second degree misdemeanor, with penalties that may include a maximum of 60 days jail or six months of probation, and a \$500 fine. Where an underage

person commits a second or subsequent offense, the incident can be charged as a first degree misdemeanor, with penalties of up to 1 year in jail or twelve months of probation, and a \$1,000 fine.

In addition to the above-described penalties, an underage person who is convicted of possession of alcohol will automatically lose their driver's license for a period of 6 to 12 months. For a second or subsequent offense, the mandatory revocation period increases to 2 years.

Under Florida law, driving under the influence (DUI) of alcoholic beverages, chemical substances, or controlled substances is an offense, proved by the impairment of normal faculties or an unlawful blood alcohol level of .08 or above. Penalties for DUI are based on the number of prior convictions, the blood alcohol level, or if there was a minor in the vehicle. Penalties range from \$500 to more than \$4,000. Imprisonment, sentencing to a residential alcoholism or drug abuse treatment program vary based on similar conditions. Additionally, the driver may face penalties relating to driver license revocation.

### **C. Health Risks**

The use of drugs, including alcohol and tobacco, can produce serious short and long term health risks. Substance use can lead to dependency and addiction, health problems, mental illness, social issues, and violence. Beyond the harmful consequences for the individual, drug and alcohol use can cause serious emotional, mental, and physical health problems for others.

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgement and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low-to-moderate doses of alcohol also increase the incidence of a variety of aggressive acts including domestic and child abuse. Moderate-to-high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and intellectual disabilities. In addition, research indicates that children of alcoholic parents are at greater risk of becoming alcoholics than are other youngsters.

A summary of the health risks associated with the substances covered by the Controlled Substances Act (21 USC 811) are summarized in the Appendix. For additional health risks specifically related to your situation, contact your health care provider.

## D. Drug and Alcohol Programs

Students and employees who use controlled substances or who abuse alcohol are encouraged to seek assistance through the campus Student Services office or the office of the Campus Executive Director. A binder of community resources can also be found in the Learning Resource Center at the campus. Employees are also encouraged to seek confidential assistance from the Human Resources department at the corporate office by calling 757-456-5065. The staff will assist you or provide an appropriate referral. Although the school does not have in-house counseling or treatment services, many options are available in the surrounding areas for employees and students in need of substance-abuse counseling, treatment, or rehabilitation and reentry programs.

You can find treatment facilities in your area by searching at [www.findtreatment.gov](http://www.findtreatment.gov). In addition, the school maintains the following list of national and local services and hotlines related to substance abuse. For more information relating to your area and needs, contact the Campus Executive Director or the Student Services Coordinator for a confidential discussion.

### National Hotlines

Organization	Phone/Web	Services
Substance Abuse and Mental Health Services Administration (SAMHSA)	1-800-662-HELP	information on alcohol and drug abuse, local treatment options, support through hotline counselors about to speak with about alcohol, drug or family problems
Alcoholic Anonymous	<a href="http://www.aa.org">www.aa.org</a>	Recovery assistance from alcoholism
Al-Anon and Alateen	<a href="http://www.al-anon.org">www.al-anon.org</a>	Guide for family whose lives have been affect by someone else's drinking
Narcotics Anonymous	<a href="http://www.na.org">www.na.org</a>	Recovery assistance from addiction
National Alcoholism and Substance Abuse Information Center	1-800-784-6776	National database of the alcohol rehab treatment and drug rehab treatment centers for every level of treatment option
HelpGuide	<a href="http://www.helpguide.org">www.helpguide.org</a>	Guides to mental health and wellness, including addition and recovery information
National Suicide Prevention Lifeline	1-800-273-TALK Call or text: 988	24/7 support for people in distress
National Sexual Assault Hotline	800-565-4673	24/7 assistance for survivors of sexual violence and harassment
National Domestic Violence Hotline	800-799-7233	24/7 assistance for survivors of domestic violence
Veteran Crisis	Dial 988, press 1	27/4 crisis support for Veterans and their loved ones

### Local Drug and Alcohol Related Services

Facility	Services	Address	Phone
A New Hope Recovery Services	Intervention, case management, recovery	243 West Park Avenue, Winter Park FL 32789	407-501-8490
Advanced Recovery Systems	Alcoholism treatment	750 S. Orlando Ave, Winter Park FL 32789	321-527-2576
Cardinal Opioid Treatment	Opioid recovery, treatment, prevention	809 Orlando Ave, Winter Park, FL 32789	407-787-9944

Professional Treatment Centers	Addiction treatment	7151 University Blvd, Winter Park FL 32792	321-972-4618

**E. Disciplinary Sanctions**

Student Sanctions. In accordance with the Student Code of Conduct, use, possession, or distribution of illegal narcotic, alcoholic, or other controlled substances, except as expressly permitted by law, to include public intoxication, is a Level I violation and is deemed to be among the most serious types of violations. As a condition of enrollment, students must abide by the terms of this policy and the Student Code of Conduct. If any violation of the standards of conduct are violated, sanctions will be imposed which would include the following.

- Reporting the violation to law enforcement officials.
- Remove a student from Institution activities, to include classroom lecture, practical labs, and externships, when impairment is noted or feared.
- Taking appropriate disciplinary action against such student, up to and including probation, expulsion, termination of enrollment

Employee Sanctions. Our Institute’s reputation depends entirely on the ethical and legal behavior of its employees. The Institute is committed to a standard of ethics, integrity and compliance with applicable laws in all aspects of conducting business. As such, employees are expected to observe standards of ethical conduct as described in the Employee Handbook and in this policy. If any violation of the standards of conduct are violated, sanctions will be imposed which would include the following.

- Reporting the violation to law enforcement officials.
- Remove the employee from the workplace or any Institution activities when impairment is noted or feared.
- Submission to a drug, alcohol, or illegal substance test.
- Taking appropriate disciplinary action against such employee in accordance with the Employee Handbook, which could include verbal or written warning, performance improvement plan, demotion, suspension, or separation of employment.
- Require participation in a substance abuse rehabilitation program approved for such purposes by a federal, state, local health, law enforcement or other appropriate agencies as a condition of continued employment.

**(2) Biennial Review**

The school will complete a review of the Drug and Alcohol Abuse Prevention (DAAPP) policies and procedures. The biennial review will occur no later than February of each odd numbered year (2023, 2025, 2027, etc) and cover the previous two calendar years. For example, the review conducted in February 2023 will cover the calendar years 2021 and 2022.

The school will form a task force to accomplish the biennial review, to include at a minimum the following individuals. The task force will include the Campus Executive Director or Assistant Campus Director, the Student Services Coordinator, the Director of Education, and other campus representatives as needed. The objective of the review is to determine the effectiveness of, and to implement any needed changes to the DAAPP and to ensure the campus is enforcing the disciplinary sanctions and

policies consistently. In accomplishing the objectives, the following steps will be considered during the review.

1. Determine the number of drug and alcohol-related violations and fatalities that occurred on campus or as part of any institution's activities and are reported to campus officials during the last 2 years. Document the particulars of the offense(s), any mitigating circumstances, and the school sanctions imposed. Cover student and employee violations. Remove all personally identifying information from the documentation.
2. Review the offenses and subsequent institutional sanction. Compare data obtained year over year. Have the sanctions been enforced consistently?
3. Are there any recommendations for improvement in consistency of the disciplinary policies?
4. Review the educational programming held at the campus during the previous 2 years relation to the policy. Has the DAAPP policy been effective in preventing the possession, use, or distribution of drugs or alcohol, as defined in this statement?
5. If not, what action plans are in place to improve the process.

The Biennial Review Report, at a minimum, should include answers to the above questions. The report will also include a written statement certifying that the school has adopted and implemented the drug prevention program described in § 86.100. The report and the certification statement will be kept on campus and a copy emailed to the Director of Academic Affairs at the corporate office no later than February 28 of each odd numbered year. A copy of the Biennial Review Report will be posted on the school's consumer information web site.

### **3) Record Keeping**

The school will keep a copy of the annual Drug and Alcohol Prevention Plan policies, reports and backup documentation from the biennial review, and any other records reasonably related to the school's compliance with the drug and alcohol abuse prevention program for a minimum of 5 years.

Appendix: Health Risks Associated with Use of Illicit Drugs and Abuse of Alcohol

<i>Drug</i>	<i>Schedule</i>	<i>Trade Names</i>	<i>Medical use</i>	<i>Dependency</i>	<i>Usual method of abuse</i>	<i>Possible effects</i>	<i>Effects of Overdose</i>	<i>Withdrawal</i>
<b>Narcotics</b>								
Fentanyl	II	Apache, China Girl, Dance Fever, Friend, Goodfellas, Great Bear, He-Man, King Ivory, Murder 8, Tango & Cash.	Analgesic, anesthetic	High	Injected, snorted, smoked, oral,	Drowsiness, inability to concentrate, apathy. Slowed physical activity, constriction of the pupils, flushing of the face and neck, constipation, nausea, vomiting, and slowed breathing	Overdoses of narcotics are not uncommon and can be fatal. Constricted (pinpoint) pupils, cold clammy skin, confusion, convulsions, extreme drowsiness, and slowed breathing	Restlessness, irritability, loss of appetite, nausea, tremors, drug craving, severe depression, vomiting, increased heart rate and blood pressure, and chills alternating with flushing and excessive sweating
Heroin	I	Big H, Black Tar, Chiva, Hell Dust, Horse, Negra, Smack, and Thunder	None	High	injected, smoked, snorted			
Hydromorphone	II	D, Dillies, Dust, Footballs, Juice, Smack	Pain reliever	High	Oral, ingestion			
Methadone	II	Amidone, Chocolate Chip Cookies, Fizzies with MDMA, and Wafer	Analgesic	High	Swallowed, injected			
Morphine	II	Dreamer, Emsel, First Line, God's Drug, Hows, MS, Mister Blue, Morf, Morpho, Unkie	Pain reliever	High	Oral, injected			
Opium	II	Aunti, BigO, Black ill, Chinese Molasses, Dopium, Dreams, FiDoNie, G, God's medicine, Guma, Joy, Midnight Oil, O, OP, Pox.	None	High	Smoked, injected, oral			
Oxycodone	II	Hillbilly Heroin, Kicker, OC, Ox, Roxy, Perc, and Oxy, OxyContin	Analgesic	High	Oral, injected			
<b>Stimulants</b>								
Amphetamines	II	Bennies, Black Beauties, Crank, Ice, Speed, and Uppers	Treat ADHD	High	Oral, injected	Sense of exhilaration, enhanced self-esteem, improve mental and physical performance, increase activity, reduce appetite, extend wakefulness for prolonged period, Chronic, high-dose use is frequently associated with agitation, hostility, panic, aggression, and suicidal or homicidal tendencies, tolerance	In overdose, unless there is medical intervention, high fever, convulsions, and cardiovascular collapse may precede death. Because accidental death is partially due to the effects of stimulants on the body's cardiovascular and temperature-regulating systems, physical exertion increases the hazards of stimulant use	Abrupt cessation is commonly followed by depression, anxiety, drug craving, and extreme fatigue
Cocaine	II	Blow, Coca, Coke, Crack, Flake, Snow	Rare	High	Snorted, injected, smoked			
Khat	I, IV	Abyssinian Tea, African Salad, Catha, Chat, Kat, and Oat	None	High	Chewed, smoked			
Methamphetamine	II	Batu, Bikers Coffee, Black Beauties, Chalk, Chicken Feed, Crank, Crystal, Glass, Go-Fast, Hiropon, Ice, Meth, Methlies Quick, Poor Man's Cocaine, Shabu, Shards, Speed, Stove Top, Tina, Trash, Tweak, Uppers, Ventana, Vidrio, Yaba, and Yellow Bam	Obesity, ADHD	Moderate	Swallowed, snored, injected, smoked			
<b>Depressant</b>								
Barbiturates	I, III, IV	Barbs, Block Busters, Christmas Trees, Goof Balls, Pinks, Red Devils, Reds & Blues, and Yellow Jackets	Sedatives, hypnotics, anesthetics, anticonvulsants	High	Swallowed, injected	Sleepiness, amnesia, impaired mental function, confusion. Slurred speech, loss of motor coordination, weakness, headache, dizziness	Extreme drowsiness, confusion, impaired coordination, decreased reflexes,	Withdrawal can be life threatening

<i>Drug</i>	<i>Schedule</i>	<i>Trade Names</i>	<i>Medical use</i>	<i>Dependency</i>	<i>Usual method of abuse</i>	<i>Possible effects</i>	<i>Effects of Overdose</i>	<i>Withdrawal</i>
Benzodiazepine	IV	Benzos and Downers, valium, zanax, Ativan, klonopin, flurazepam,	Anesthesia, insomnia, anticonvulsant	Low	Oral, snorted	vomiting, low blood pressure. Prolonged use produces physical and psychological dependence and tolerance	respiratory depression, coma, and possible death. Overdose effects of concomitant use of benzodiazepines and opioids include: Profound sedation, respiratory depression, coma, and death	
GHB	I III	Sodium oxybate, xyrem	None	High	Ingested			
Rohypnol	IV	Date rape drug, Forget Pill, La Rocha, Lunch Money Drug, Mexican Valium, Pingus, R2, Reynolds, Roach, Roopies, Roofies, Row-Shay, Wolfies	None		Oral			
<b>Hallucinogens</b>								
Ecstasy/MDMA	I	Adam, Beans, Clarity, Disco Biscuit, E, Ecstasy, Eve, Go, Hug Drug, Lover's Speed, MDMA, Peace, STP, X, and XTC	None	High	Oral	Sensory effects, perceptual distortions, flashbacks, elevated heart rate, increased blood pressure, dilated pupils, nausea and vomiting.	Psychological harm, fear, depression, anxiety, and paranoia. Deaths generally occur due to suicide, accidents, dangerous behavior, inadvertently eating poisonous plant material. Respiratory depression, coma, convulsions, seizures, and death due to respiratory arrest	
Ketamine	III	Cat Tranquilizer, Cat Valium, Jet K, Kit Kat, Purple, Special K, Special La Coke, Super Acid, Super K, and Vitamin K	anesthetic	Moderate	Snorted, smoked, oral, injected			
LSD	I	Acid, Dots, Mellow Yellow, Window Pane	None	High	Oral			
Peyote & Mescaline	I	Buttons, Cactus, Mesc, and Peyoto	None	High	Oral, smoked			
Psilocybin	I	Magic Mushrooms, Mushrooms, and Shrooms	None	High	Oral			
<b>Steroids</b>								
Anabolic Steroids	III	Arnolds, Juice, Pumpers, Roids, Stackers	Hormone deficiencies, delayed puberty		Oral, injected, applied to skin	Mood swings, hostility, impaired judgement, aggression, growth stunt in adolescents, changes in sexual development, high cholesterol levels, acne and fluid retention, liver damage	Anabolic steroids are not associated with overdoses.	Depression
<b>Marijuana/ Cannabis</b>								
Marijuana	I	Aunt Mary, Bud, Blunts, Chronic, Dope, Gangster, Ganja, Grass, Hash, Herb, Joint, Kif, Mary Jane, Mota, Pot, Reefer, Sinsemilla, Skunk, Smoke, Weed, Yerba	None	Moderate	Smoked, oral	Learning impairments, dizziness, nausea, tachycardia, flushing, tremors, merriment, relaxation, sedation, blood shot eyes, coughing, increased appetite, increased blood pressure, burnt lung tissue	None	Restlessness, irritability, sleep difficulties
Marijuana concentrates	I	710, wax, honey oil, budder, butane honey oil, shatter, dabs, black glass, errl.	None	Moderate	Smoked, oral			
Vaping	--	E-cigs, e-hookahs, mods, vape pens, vapes, and Juuls or Juuling	None	Moderate	Inhaling			
<b>Inhalants</b>								
Inhalants	--	Gluey, Huff, Rush, and Whippets	None		inhaled	Brain damage, cognitive abnormalities, slow body function,	Loss of consciousness, death by asphyxiation	

<i>Drug</i>	<i>Schedule</i>	<i>Trade Names</i>	<i>Medical use</i>	<i>Dependency</i>	<i>Usual method of abuse</i>	<i>Possible effects</i>	<i>Effects of Overdose</i>	<i>Withdrawal</i>
						loss of consciousness, drowsy		
<b>Designer Drugs</b>								
Bath Salts		Bliss, Blue Silk, Cloud Nine, Drone, Energy-1, Ivory Wave, Lunar Wave, Meow Meow, Ocean Burst, Pure Ivory, Purple Wave, Red Dove, Snow Leopard, Stardust, Vanilla Sky, White Dove, White Knight, White Lightning	None		Snorting, oral, smoking, injected	Euphoria and alertness, confusion, psychosis, hallucination agitation, aggression, self destructive behavior, rapid heartbeat, hypertension, sweating, headaches, palpitations	Nausea, anxiety, seizures, stroke, coma, organ injury, death
